

Impartiality Policy Statement

Ecoryx Ltd. Company (Ecoryx) is committed to conducting all GHG validation and verification activities with the highest standards of impartiality, integrity and objectivity.

Top Management Commitment:

Ecoryx's Top Management formally commits to impartiality. We do not allow commercial, financial or other pressures to compromise impartiality. This statement is publicly available on Ecoryx website and reviewed annually.

We identify and manage threats including self-interest, self-review, familiarity and intimidation. All personnel must sign impartiality/conflict-of-interest declarations.

Independent Safeguards:

An independent Impartiality Committee oversees risk, reviews disclosures and ensures review/decision independence.

Separation from Consultancy:

Ecoryx does not provide consultancy for the same claim we validate/verify. When consultancy is provided for different claims, strict barriers are applied.

Mandatory Declarations:

All personnel must submit engagement specific declarations and disclose prior client involvement.

Ongoing Monitoring:

Impartiality risks are reviewed at acceptance, planning, before decision and during management review.
